Be a socially
responsible
company.

Be a trusted
business partner.

Message from Sean Peay, Dynanet CEO

Throughout the year, we have seen many changes to our organization. We have seen staff members change positions and new employees join our team. The one thing that remains constant is the level of outstanding service that we continue to provide to our customers. In every newsletter, we highlight the work we are doing and the kudos that we are receiving from our customers. When companies talk about what differentiates them in this competitive market, I am always proud to say "it is our people". The people that work at Dynanet and their dedication to the customer is what makes us unique and will continue to make us unique.

Corporate News

Dynanet to Support the United States Product Safety Commission September 2016

Dynanet is pleased to announce that it is participating with Koniag Services Inc. to provide enterprise wide contingency planning support to the U.S. Consumer Product Safety Commission (CPSC). The Task Order focuses on Contingency Planning, Configuration Management and Risk Management practices across the agency's enterprise.

Dynanet will develop the Configuration Management practice as the pillar discipline within a larger Enterprise Quality and Contingency Planning program. Configuration Management is the hub by which other disciplines, such as Disaster Recovery, COOP, Risk Management, GSS hardening and monitoring, Identity and Access Management, are managed. Dynanet's approach to configuration management postures the CPSC's IT environment as a secure and

stable baseline, and equips the agency to effect change with little or no interruption to service.

Dynanet Awarded Health IT Special Item Number (SIN) August 2016

The General Services Administration (GSA) awarded Dynanet the Health IT SIN under GSA IT Schedule 70. The Health IT SIN provides access to Dynanet's innovative and cutting-edge Health IT technologies. It provides a simplified procurement process for Health IT services, and the ability to track Health IT spending.

Pravin Patil Recognized for Service on GSA CAMEO Project

The General Services Administration (GSA) deployed the Enterprise Content Management System (ECMS) program, which has become the primary content repository for storage and retrieval of electronic documents. This system was originally developed in mid-2000 as a GSA/FAS collaboration solution primarily utilizing eRoom, a Documentum COTS content viewer. In 2009, GSA/FAS began a Multiple Award Schedules (MAS) contract digitization program to create one place where an acquisition professional

can view a complete contract file and to move the organization to end-to-end electronic contracting. GSA's need to store, manage and retrieve massive amounts of unstructured data in support of their application portfolios was growing. In order to gain adoption as a GSA enterprise-wide standard, the current API's and web services need to be simplified, follow SOA principles in managing context, and provide a secure connection between the application and the document asset.

The GSA CAMEO program looked to Pravin Patil, Dynanet's ECMS Application Architect, to design and subsequently develop a new interface to GSA's ECMS through an Extensible Markup Language (XML) web service. As a result, all requests and responses are made through web method calls from any business line application. For every method call, the new ECMS web service responds with an XML file with meta data or the unstructured document data. The new web service interface 1) initiates a new transaction for each request, 2) is not dependent on the context or state of any another interface or the calling application, 3) follows SOA principals for stateless service design and 4) provides a secured SSL connection between client applications and ECMS web services for every transaction. Today, this new service meets or exceeds all GSA's requirements for an agency wide ECMS implementation.

As GSA looks to move from the current Documentum back-end to a Cloud centric Alfresco instance, the customer has once again turned to Pravin to help with the architectural design and ultimate migration of GSA's unstructured digital data. Today, Pravin continues to work tirelessly to achieve GSA's Cloud-based ECMS. Thank you Pravin for your service and dedication.

Employee Profile

Megan Mathis, Office Manager

I recently joined Dynanet as the new Office Manager. I grew up in Howard County and recently bought a house in Carroll County. I like to spend my free time with my husband of four years and my daughter. One of our favorite things to do is take our dog Curtis for hikes and to play in the stream near our house. I have held several different jobs before recently joining Dynanet. I spent five years as an Office Manager for a small woman-owned company. In my last position, I was a Professional Recruiter with a local staffing agency. I feel like my past experiences have helped me transition into this role smoothly and have given me the tools needed to help out the team in many different ways. I have really enjoyed

ABOUT DYNANET

Dynanet Corporation has a long history of successfully assisting federal and state governments in accomplishment of their missions. The proof of our success is in the numerous accommodations and awards we have been given and the list of partners who choose Dynanet as a business team member. A highly experienced and senior leadership team with both private sector and federal experience leads our talented and certified professionals.

Feedback

We hope you find the information in this issue of the Dynanet Newsletter useful. Please let us know what you think. Send your feedback to Sherri Brown at sbrown@dynanetcorp.com

my time with Dynanet thus far. Everyone has been very helpful and friendly! I am looking forward to my future here with Dynanet.

Social Responsibility

Dynanet Attends Cystic Fibrosis Foundation Event September 2016

Dynanet was proud to again sponsor the annual Howard County Wine Masters event to benefit the Cystic Fibrosis Foundation. The Cystic Fibrosis Foundation (CFF) is the world's leader in the search for a cure for cystic fibrosis, a life-threatening, genetic disease affecting the lungs. CFF supports cystic fibrosis patients through research and funding to help find a cure and provide patients resources to help them live more full and productive lives.

Dynanet Supports "Ride 2 Recovery" September 2016

Dynanet supported the "Ride 2 Recovery" that makes a difference in the lives of healing heroes. The Honor Ride is a non-competitive cycling event that lets the public ride alongside our healing heroes. Dynanet was one of 11 DV United joint venture members that have contributed to this worthy cause.
