Be a socially  
responsible  
company.

Be a trusted  
business partner.

## Message from Sean Peay, Dynanet CEO

For over 20 years, our main goal has always been to provide excellent customer service to every customer, every time on every project. As you read this issue of our newsletter, you'll see where this excellent customer service is happening from the outstanding work we are doing at OPM to the internal customer service our human resources department provides to each Dynanet employee and new recruit. This focus on customer satisfaction continues to turn into positive results for Dynanet from the award of a contract with CMS SPARC to new projects with existing customers.

## Corporate News

### Dynanet Awarded CMS SPARC IDIQ Prime April 2017

The Centers for Medicare & Medicaid Services (CMS) awarded Dynanet a contract (# HHSM-500-2017-000221) on their Strategic Partners Acquisition Readiness Contract (SPARC) IDIQ contract. SPARC is the new ten-year multiple award IDIQ contract available to all components within CMS to procure their IT requirements. The purpose of this contract is to provide strategic, technical, and program management advice, guidance and support services to CMS to facilitate the modernization of business processes and supporting systems and their operations. These systems will include the Federal Healthcare Exchange and Medicare/Medicaid information technology systems. Other Department of Health and Human Services (HHS) Operating Divisions (OPDIVs) may place orders under this contract as well.

SPARC task orders may offer a faster procurement timeline (4-6 months) versus full and open procurement (9-12 months), incorporating the new Acquisition Plan (AP) guidelines as updated by the HHS Acquisition Regulations (HHSAR). There is also the

cost benefits as the task orders solicited and awarded under SPARC do not include an administrative fee as found on IDIQ's outside of the agency. Lastly, the large diversity of technically capable business entities under the SPARC IDIQ environment allows for teaming arrangements and partnering (subcontracting) based on the specific requirements of each task order.

### Dynanet ISO 9001:2015 Recertification April 2016

Dynanet's Quality Management System has been assessed and found to be in compliance with the standard ISO 9001:2015 applicable to design, development and support of software projects and services. ISO 9001 is the international standard that specifies requirements for a quality management system (QMS). Organizations use the standard to demonstrate the ability to

consistently provide products and services that meet customer and regulatory requirements. ISO 9001 is based on the plan-do-check-act methodology and provides a process-oriented approach to documenting and reviewing the structure, responsibilities, and procedures required to achieve effective quality management in an organization. Specific sections of the standard contain information on topics such as:

- Requirements for a quality management system, including documentation of a quality manual, document control, and determining process interactions
- Responsibilities of management
- Management of resources, including human resources and an organization's work environment
- Product realization, including the steps from design to delivery
- Measurement, analysis, and improvement of the QMS through activities like internal audits and corrective and preventive action

Changes introduced in the 2015 revision are intended to ensure that ISO 9001 continues to adapt to the changing environments in which organizations operate. Some of the key updates in ISO 9001:2015 include the introduction of new terminology, restructuring some of the information, an emphasis on risk-based thinking to enhance the application of the process approach, improved applicability for services, and increased leadership requirements.

### Employee Kudos

#### OPM Recognizes Dynanet's Kristaiah Chillumula and Ronnie Fawehinmi

Pictured Above: Kristaiah Chillumula

Pictured Above: Ronnie Fawehinmi

Dynanet employees Ronnie Fawehinmi and Kristaiah Chillumula were recognized for their work on the Office of Personnel Management's (OPM) eQIP application, "I would like to take a moment to thank you for all your effort in automating the eQIP application. I really appreciate the teamwork involved in accomplishing this task. I also want to give a BIG 'Shout Out' to Ronnie who came to the test team with no Automation knowledge, but has quickly ramped up her knowledge base with the help of Kristaiah to become one of our 'Automation Testers'!!! I really cannot say enough of the great teamwork of this group! TO ALL, I say a BIG Thank You!!!! Let's keep it up. This is definitely a 'WIN' for the test team, as it would help with efficiently validating the SF86 project, a high priority AGILE project for NBIB [National Background Investigation Bureau]. I know we are not close to being done; however, I wanted to take a moment to let you know how much I appreciate what has been accomplished so far and look forward to the complete automation of the application," Gina Davis, OPM Manager of the Systems Integration Testing Project.

#### ABOUT DYNANET

Dynanet Corporation has a long history of successfully assisting federal and state governments in accomplishment of their missions. The proof of our success is in the numerous accommodations and awards we have been given and the list of partners who choose Dynanet as a business team member. A highly experienced and senior leadership team with both private sector and federal experience leads our talented and certified professionals.

#### Feedback

We hope you find the information in this issue of the Dynanet Newsletter useful. Please let us know what you think. Send your feedback to Sherri Brown at [sbrown@dynanetcorp.com](mailto:sbrown@dynanetcorp.com)

Dynanet has provided an e-QIP testing automation solution to OPM in a short duration of time. Currently, it is taking up to 16 hours manually to create one record in the SF86 form. The solution provided is a reusable data driven automation testing where quality assurance teams can create user data as quickly as 15 minutes in the SF86 form. This automation solution can also be used to run functional testing for various scenarios. Automating e-QIP would help with efficiently validating the SF86 project, a high priority AGILE project for NBIB.

## Employee Profile

### Susan Smith, Director Recruiting

I joined Dynanet Corporation in June 2012. Wow, has it been 5 years already! I enjoy working every day with Dynanet, it is like family!

I have been in the HR/Recruiting industry for over 30 years. I grew up in Prince George's County, graduated from University of Maryland, University College, with a BS Degree in Business Management. Then worked for various government contracting companies such as Litton Amecom/Northrop Grumman, Alion Science and Technology, and Artic Slope Regional Corporation (ASRC) as a Recruiting Manager. Throughout my career, I have hired and trained a number of Recruiters and Coordinators and taught them Full-Cycle Recruiting from posting requisitions, sourcing resumes, interviewing process, to extending offers. I am a Human Resource Professional with solid experience hiring Program Managers, IT Developers, Business Analysts, Systems Engineers and many more for Cleared and Non-Cleared positions. Through the years, I have grown to understand the needs of our customers and their requirements and use the best resources to find the most qualified candidates.

I have two daughters and stay busy with their lives. I enjoy attending Zumba and conditioning classes at the gym. On weekends I enjoy spending time with friends, going out to dinner and taking weekend trips to the beach.

Dynanet is a great place to work, and I am honored to recruit new hires for this exciting and growing company.
